

Transmission & Hydraulic System Care

KUBOTA UDT Fluid.

Mr. Reliable

KUBOTA UDT Fluid is a multi-purpose all-weather tractor hydraulic fluid.

This product is specifically recommended for use in the KUBOTA hydraulic, final drive, transmission, differential, and wet brake systems of tractors.

Service Tips

1. Check oil levels daily.
2. The engine must be stopped before replacing the oil filter to avoid injury.
3. Smear some clean oil on the filter o'ring when replacing the oil filter.
4. Ensure oil drain plugs are tight and secure before filling the transmission with oil.
5. Ensure the areas around the fill plugs are clean (free from dirt) before filling the transmission with oil.
6. Never overfill the transmission.
7. After 2 min's operations, check for oil leakage and hydraulic system function.
8. Recheck the oil level.

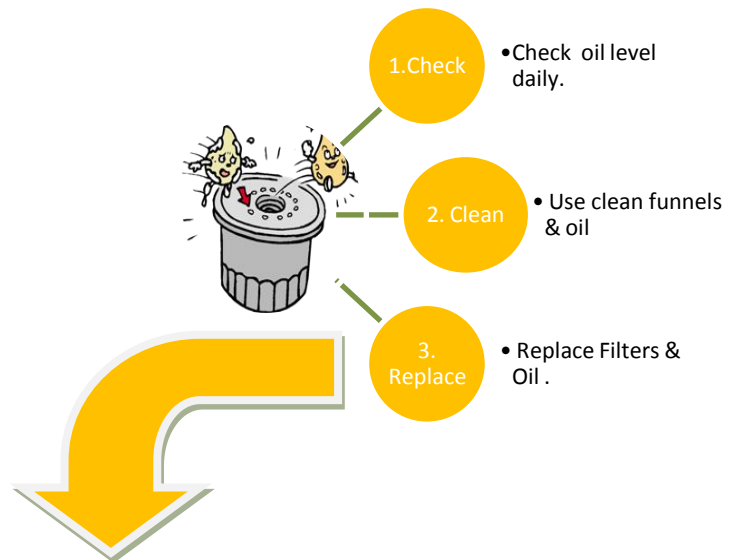

KUBOTA UDT Oil

- Longer life & less down time.
- Improves efficiency in synchro transmissions
- High performance protection even at high operating temperatures.
- Meets KUBOTA's stringent specifications.

KUBOTA Filters

- KUBOTA Filters have the correct specified micron rating to ensure your hydraulic system remains healthy.
- Just like BLOOD, oil needs to be properly filtered.
- If the filter is clogged, then the transmission and hydraulic system function will be affected.
